

The fastest and most cost effective way to get here...

Real time internet access for your clients, brokers, participants and other authorized parties.

Advantages

- CSPWeb runs on your server so your data is always under your control.
- There are no “per participant” fees that limit your ability to compete.
- Your clients can add new participants, reducing your administration costs.
- Plan participants can view their payment status, coverage, dependents and other data. They can self enroll, freeing your staff for other work.
- It’s complete - providing all functions - without additional charges for each component.

Security

- CSPWeb was built using the latest Open Web Application Security Project (OWASP) standards. Requirements designed to minimize the risk that your data will be compromised. While a certain amount of risk is inherent in any internet exchange of data CSPWeb includes all currently available safeguards.
- Automatic logging of all access activity is maintained, providing a complete record of who, when and what was done during log in.
- An “adverse events” log is always available to advise of any unusual activity.
- Log in retry attempts are limited.
- User log in requires a 4-11 character User ID and a 4-11 character password. Users can change their own passwords.
- Administrator can limit user abilities to specific client and actions within that client.

Easy To Use

Special care was taken to make the web interface as simple and easy as possible. It was “user tested” to assure that almost anyone can complete all functions with a minimum of instruction.

- All functions are available from a single navigation panel.
- All pages are layed out with the same “look and feel”.
- Where special formats are required a sample is displayed.
- Wizards are used for functions such as adding a new participant.
- When a mistake is made the user gets a simple error message.
- User Help screens can be customized for specific situations.

Easy To Set Up

- CSPWeb is the fastest route to get your clients to the cloud. Setup is completed using an install that automatically does most of the configuration - just provide the location of the components.
- CSPWeb can be completely operational within hours. Our expert support staff can guide you through the process step by step.
